IFE2009 gives an new norm for
fire extinguisher and convinced in 4 important points:

technology - ecology - safety - economy

- ⇒ pressureless
- ⇒ automatically – don't access in automotive engineering
- ⇒ utterly maintenance free
- ⇒ no faulty activation possible
- ⇒ activation only with fire/ flame or temperature of 170°C
- ⇒ without toxin and ecologically sensitive
- ⇒ no corrosion
- ⇒ using powder is not aggressively or damaging for technology
- ⇒ after activation in fire technology can be used again (only suction-cleaning or washing-up technology and remove cause of fire)
- ⇒ IFE2009 is well-priced in acquisition and installation
- ⇒ short time of installation
- ⇒ no follow-up costs because of maintenance free

**Save your property,
your means of existence and
your good reputation!**

**Promote with safety
of your vehicles and machinery**
